+15-25 longer break after 4 pomodoros	Don't have ticking sounds	blue for work session, green for short break, orange for longer break	
Notification noise when timer ends			
notification pop-up			
Task List			

Questions: Do we kill the Pomodoro if we finish the task? Or do we start a new one

The typical length of a pomodoro is 25 minutes, it is indivisible, so if you finish early, you should review your work, not start anything new. If you get interrupted by something important, the pomodoro is void

Do we allow them to exit if they have tasks leftover?

When you kill the Pomodoro, does the timer restart or do they manually have to start the Pomodoro cycle again?
